Re:  
Shore Road Allowance Closure and Conveyance  
Jacqueline Ferkul – Fronting Part Lot 35, Concession 4, Location CP 317 PCL 9308 SS,  
Geographic Township of Conger (223 Healey Lake Water)  
Application SR04-2023

Dear Ms. Pinto,

Subsequent to Council approval of our request to purchase the Shore Road Allowance, in front of my property at 223 Healey Lake water, I engaged a surveyor to prepare a draft plan of the property. The surveyor determined that there are buried dispersion pits located just outside the property line on the eastern side. He noted that the municipality requires the pits to be 3 m back from the property line. The pits would be difficult to relocate due to the rocky nature of the site. He therefore recommended that I request a modification to the property line to extend it 3 m in each direction from the dispersion pits.

I was informed by the previous owner that the dispersion pits were inspected and approved by the Township at the time of their installation. At that time, no one was aware that they were slightly off the property.

I have attached of a sketch, prepared by the surveyor, showing the proposed alteration to the property line previously approved. I would like to request approval of this change. If acceptable to the municipality, I will request to purchase the land from the Crown, who owns the property.

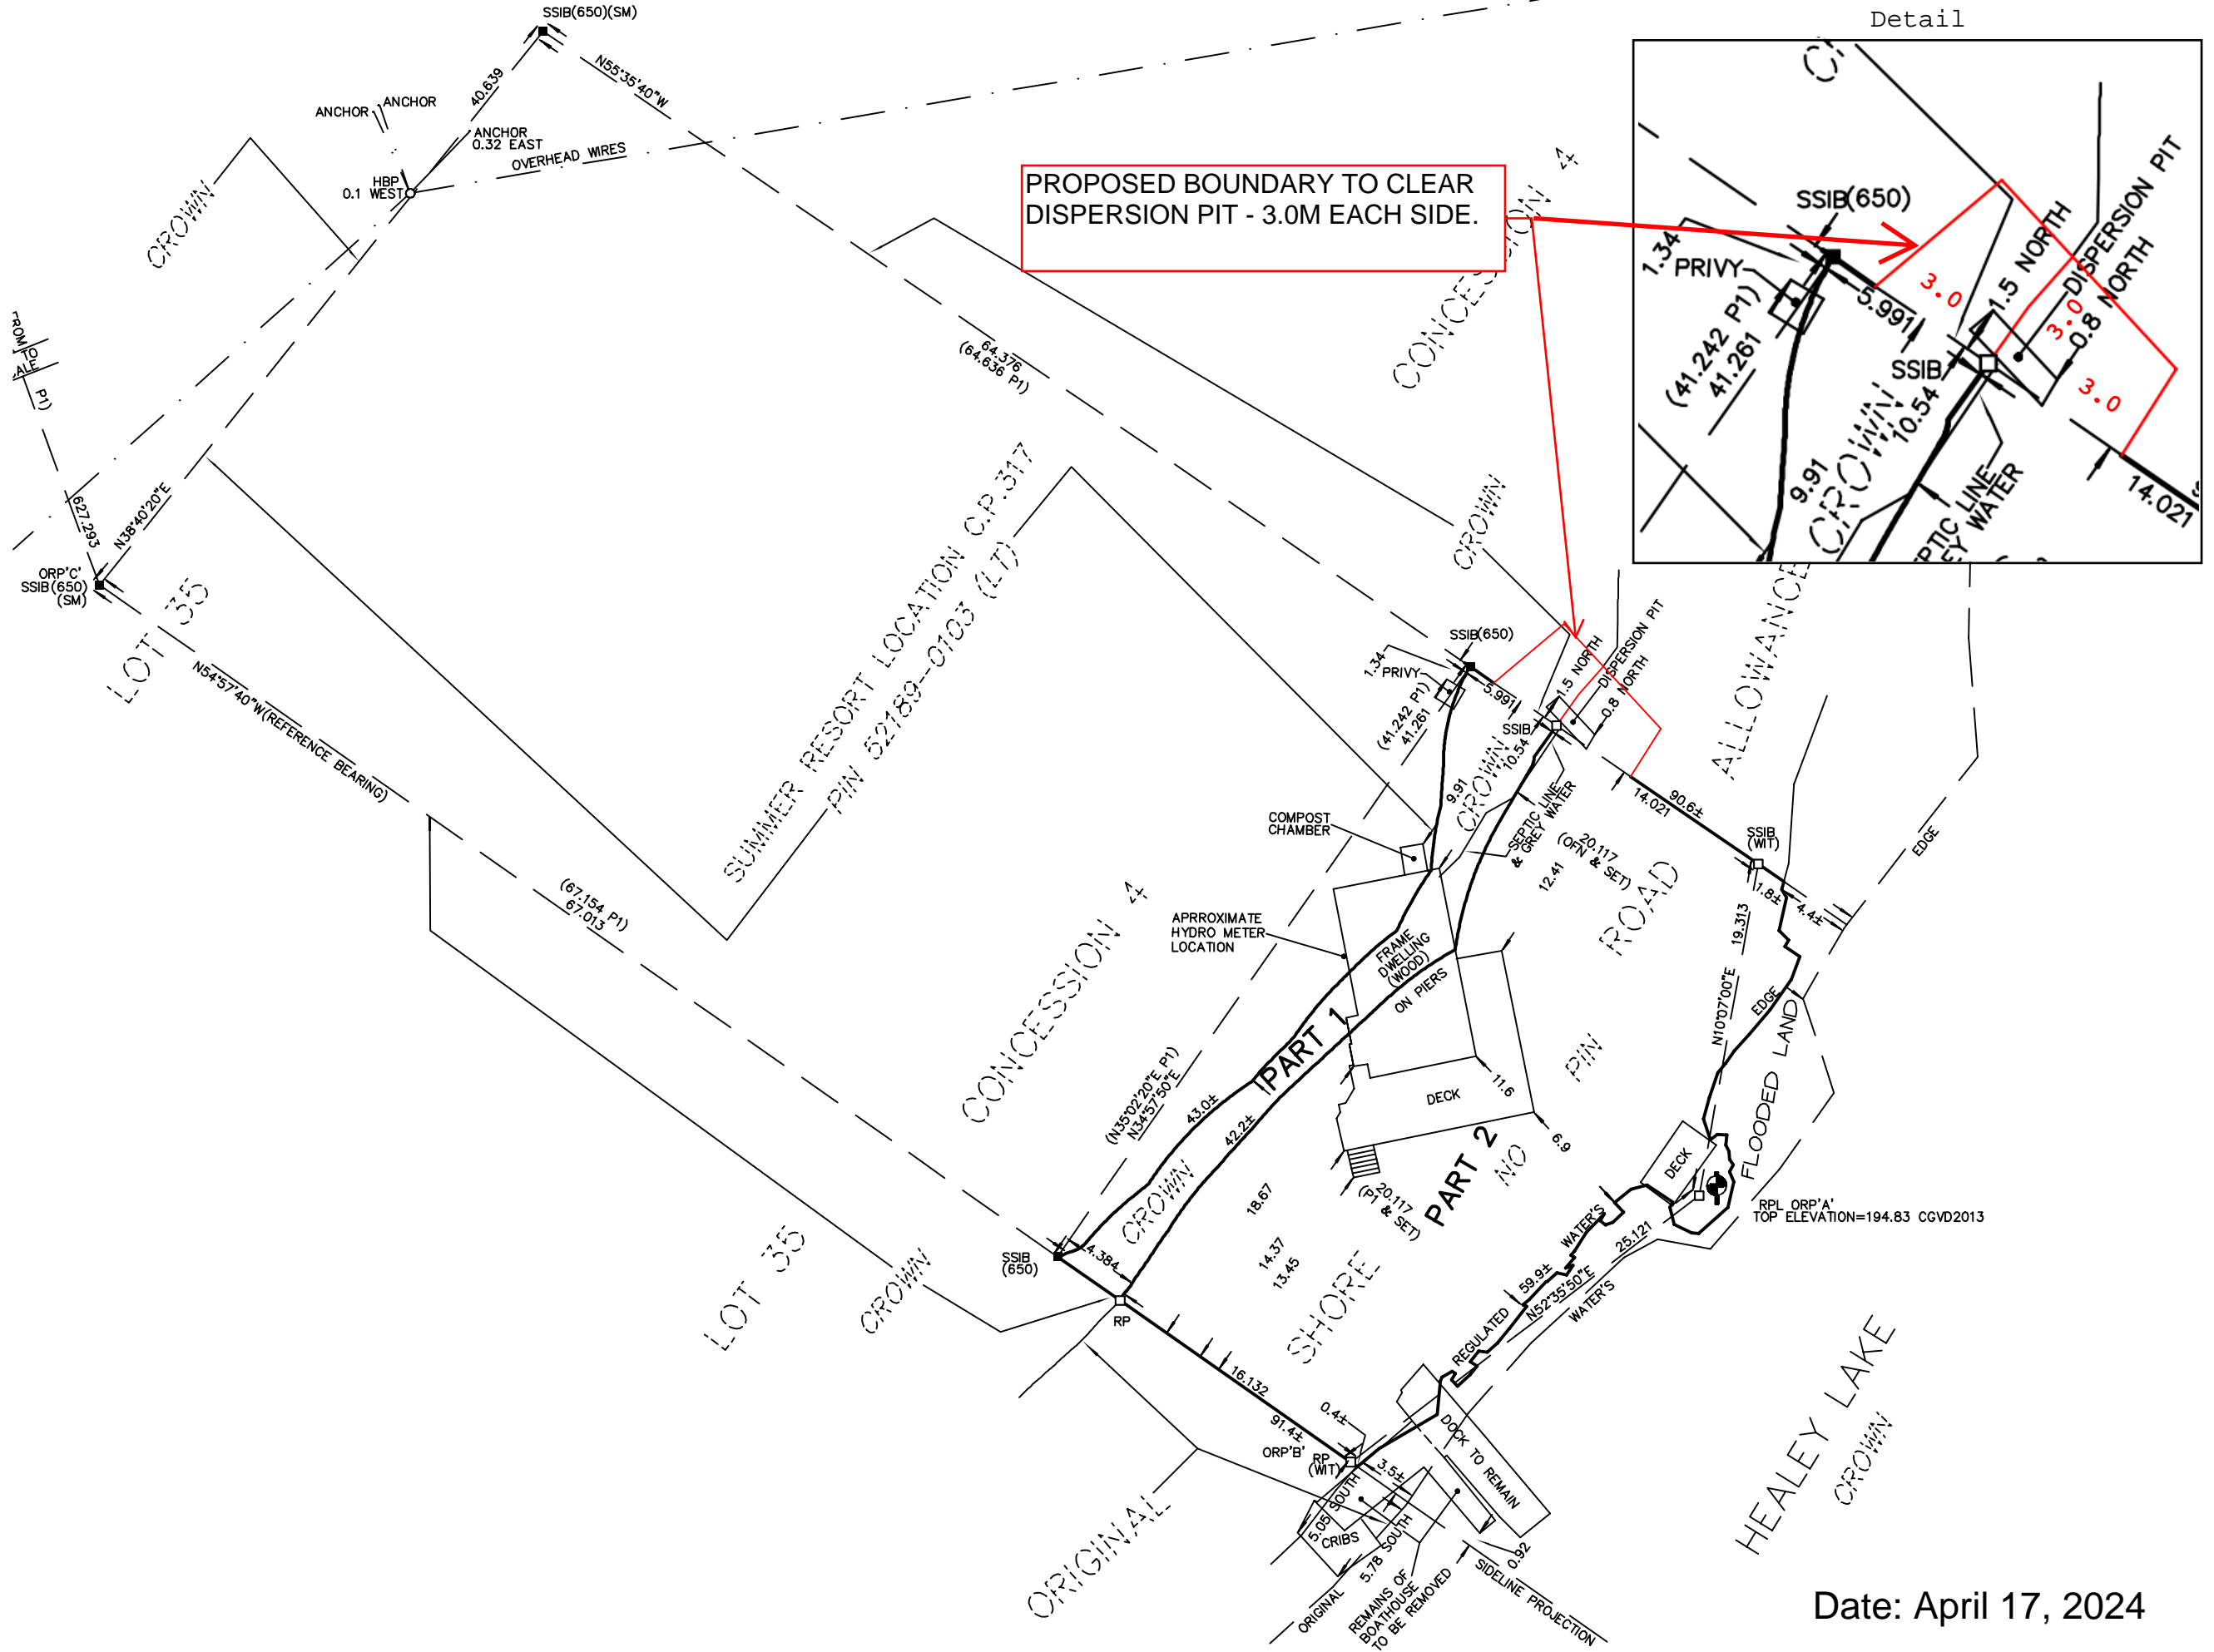

Thank you for your consideration of this request.

Regards,

Jacqueline Ferkul
