

Skerryvore Ratepayers' Association

Steve Spearing, President

What are we looking for?

- Community enhancement project.
- To have seating at several water access points
- To have signage at all locations.
- To have the culvert replaced at 5 Tamarack Dr.

Seating

To have the township supply and install benches at several locations.

After reviewing all the locations with Scott, Earl and Josh in June. It was determined that only a few locations were suitable for benches.

- Leaside

- Moonlight

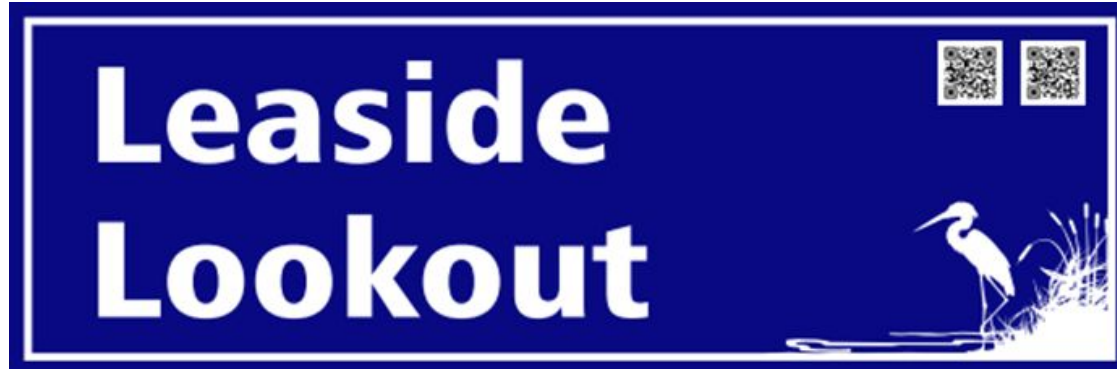

- Sandy beach (lookout lane)

The benches are approx. \$1,200.00 plus installation. We looking for Josh to come up with the best suitable bench for the locations.

Signage for water access locations.

There is sign bylaw with the TOA, but not sure if it applicable to TOA property. We would like to supply a sign for each location 12"x36" complete with a QR code for parking and water by-law. The sign will be constructed as recommended spec's provided by Josh. The TOA then would install the signs at each location. Looking for approval for the signs.

Sign proofs for the locations

Culvert replacement.

Although the culvert is not located on the road ditch. We are asking for a replacement, the culvert is located about 15' on the property and is for the ditch from the road to exit through the property. The culvert is approx. 20' in length and would require about the same amount of time and material to replace driveway culvert.

NOHFC

- Our application was declined.
- Main reason was the project is for a privately owned and managed property.
- Open for discussion.

Thank-you for your consideration.

Steve Spearing
